"I am honored to serve as BCCA President with this group of dedicated and experienced leaders."

MESSAGE FROM THE PRESIDENT

LOOKING BACK

During the last calendar year, the Board worked tirelessly building the necessary infrastructure for our organization. Under the direction of our new Executive Director, we have:

- Adopted Bylaws of the Board for Certification in Clinical Anaplastology
- Obtained new legal counsel better suited for our business model
- Resolved intellectual property infringement cases
- Obtained Directors and Officers Insurance
- Procured secure, off-site, automated cloud storage
- Obtained a registered agent and corresponding services
- Created and adopted Governance & Operation policies and procedures
- Implemented a new online CCA Recertification Process for certificants

In keeping with our commitment to ensure the continued validity, reliability, and legal defensibility of the CCA certification program, we developed the Eligibility and Examination Review task forces. The Eligibility Task Force is currently reviewing the initial standards of certification plus corresponding applications and forms to ensure currency and relevance. The Examination Review Task Force is reviewing and revising examination items, ultimately creating a new test form for the 2014 administration.

LEADERSHIP HIGHLIGHTS

This past year, the Board of Directors welcomed Juan R. García, Associate Professor at John Hopkins School of Medicine, as President-Elect; Sharon Haggerty, Director of Custom Prosthetic, Ltd., as Director; and Barbara Spohn-Lillo, President of Prosthetic Illusions Inc., as Director.

LOOKING AHEAD

In the coming year, we will embark upon a rebranding initiative which will enable us to expand the impact of our excellence well into the future. This coming year, we will focus on:

- Completion of the Policies and Procedures Manual. This Manual is established to further describe standard methods and protocols that will be followed to better execute the mission of the BCCA.
- Completion of a new Certified Clinical Anaplastology Candidate Handbook. The *CCA Candidate Handbook* will provide information essential to the certification process from application through test taking to renewal.
- Completion and launch of a thorough redesign of our website. The new site will provide easier navigation, and include a variety of updated features and information

that will help candidates and other stakeholders learn more about the organization, industry, and certification program.

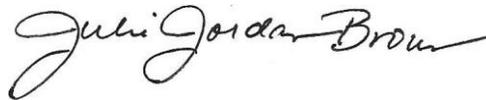

- Recruitment of subject matter experts to serve on the CCA Examination Development Committee.

Over the next two to four years, we will focus on:

- Conducting a new Job Analysis for the Certified Clinical Anaplastology examination. A Job analysis refers to procedures designed to obtain descriptive information about the tasks performed on a job and/or the knowledge, skills, or abilities thought necessary to adequately perform those tasks.
- Obtaining accreditation for the Certified Clinical Anaplastology certification program through the National Commission for Certifying Agencies (NCCA) — the accrediting body of the Institute for Credentialing Excellence (ICE).

We thank you for your dedication to the BCCA and the anaplastology profession—evident through service, professional development and continuing education. I am impressed by the active engagement of each and every member of our shared profession.

Poised for progress, we press forward with optimism.

Julie Jordan Brown
President
Board for Certification in Clinical Anaplastology

HISTORY OF THE PROFESSION AND THE BOARD FOR CERTIFICATION IN CLINICAL ANAPLASTOLOGY

Anaplastology is a profession with deep historical roots in rehabilitative medicine. For decades anaplastologists have provided reconstructive prostheses and other custom medical devices which required extra attention to esthetic design and appearance. Advancements in patient care over the last 20 years have increased the need for a dedicated level of clinical and technical skill necessary to conduct safe and effective anaplastology practice in conjunction with emerging technologies and a higher expectation of quality care. Anaplastologists work in a variety of practice settings utilizing a unique skill set to create innovations in anaplastology and advance quality patient care.

In 1980, Walter Spohn and colleagues founded the American Anaplastology Association (AAA) at Stanford University Medical Center, in Palo Alto, California. Mr. Spohn wanted the AAA to serve as an open and inspiring "Information Exchange," welcoming all of the multidisciplinary specialists involved in prosthetic rehabilitation, and to promote coordination and communication among professionals working along different but related paths in the service of the patient.

At the recommendation of an advisory committee formed in 1997, the membership of the American Anaplastology Association voted to establish a certification board in 2000 to follow the guidelines of the National Commission for Certifying Agencies (NCCA) — the accrediting body for the agency currently known as the Institute for Credentialing Excellence (ICE). This certification board became the Board for Certification in Clinical Anaplastology (BCCA).

In 2002, the Board for Certification in Clinical Anaplastology was established as a private, autonomous organization and incorporated in the state of South Carolina as a 501(c)(3) nonprofit mutual benefit corporation.

In 2008, the American Anaplastology Association voted to change the name of the organization to the International Anaplastology Association (IAA) in recognition of the emerging global profession of clinical anaplastology.

The Board for Certification in Clinical Anaplastology and the International Anaplastology Association remain strategic partners — working together to achieve objectives that are mutually beneficially for the field of anaplastology.

THE BOARD FOR CERTIFICATION IN CLINICAL ANAPLASTOLOGY

PURPOSE

Established in 2002, the BCCA develops and delivers a certification program in clinical anaplastology (Certified Clinical Anaplastologist) to ensure competence in the field of anaplastology and to promote the enhancement of patient care and professional practice in the field of anaplastology.

MISSION STATEMENT

The mission of the Board for Certification in Clinical Anaplastology is to promote and provide certification in clinical anaplastology for the enhancement of patient care and professional practice.

VISION

The vision of the Board for Certification in Clinical Anaplastology is to be recognized as the leader in clinical anaplastology credentialing.

FINANCIAL SUMMARY

The Board continuously strives to have sufficient and adequate financial resources to conduct effective certification and recertification program activities. The revenue generated by the BCCA certification program is used to support certification and recertification activities, as well as Board operations.

The BCCA operates in a predictable fiscal environment where expenditures are controlled and, in good times, a reasonable portion of the corporation's revenues shall be put aside in reserves for significant certification expenditures (e.g. job analysis). The Board regularly evaluates its fixed assets and proactively sets aside sufficient funds to facilitate maintaining and enhancing the BCCA's fixed assets to fulfill its mission.

FINANCIAL STATEMENT FOR THE YEAR ENDED DECEMBER 31, 2013

	Ordinary Income/Expense	
	Income	
	Certification Fees	
	CCA Renewal Fees	24,565.00
	New Applications	300.00
	Total Certification Fees	24,865.00
	Total Income	24,865.00
	Expense	
	Contracted fees expense	
	Bookkeeping/Office administrator	3,205.00
	Executive Director	9,624.93
	Total Contracted fees expense	12,829.93
	Bank Charges	
	Monthly fee	30.00
	Credit card fees	547.61
	Bank Charges - Other	-14.95
	Total Bank Charges	562.66
	Insurance	
	D&O insurance	675.00
	Total Insurance	675.00
	Legal Fees	
	Merchant & Gould	930.00

	BCCA Legal Counsel	500.00
	State of South Carolina	120.00
	Total Legal Fees	1,550.00
	Supplies Expense	212.50
	Office supplies	251.42
	Postage and Shipping Expense	159.82
	Printing Expense	5.69
	Web Maintenance	122.40
	Total Expense	16,369.42
	Net Ordinary Income	8,495.58
Net Income		8,495.58

CERTIFICANTS

The BCCA has developed requirements for eligibility to ensure that the application process is fair and impartial for all applicants. Each eligibility requirement has been established to ensure that individuals certified by BCCA have an acceptable level of knowledge and proficiency needed to provide clinical anaplastology services for a CCA. In establishing these requirements, the Board acknowledges that a combination of education, clinical experience and demonstrated knowledge are essential for individuals earning the Certified Clinical Anaplastology (CCA) credential.

Candidates cannot earn certification without passing the certification examination and attesting to the Code of Ethics. For a CCA certificant to ensure that he/she remains in good standing, certification must be renewed with continuing education.

OUR GLOBAL PRESENCE

There were 33 Certified Clinical Anaplastologists living in the United States of America, Canada, Europe and Western Asia in 2013. As of December 2013, there were 27 CCAs (82%) living in the United States, and four CCAs (12%) living in Canada (see Figure 1).

As shown in Figure 2, 6% of the CCAs resided internationally, including France (3%) and Dubai (3%).

The CCA examination is only offered in English. Candidates for whom English is a second language are not permitted to ask proctors, or anyone else, for assistance with translation or interpretation.

NEWS

CCA EXAMINATION

The Board for Certification in Clinical Anaplastology (BCCA) will offer the next administration of the CCA examination on May 27, 2014, in concurrence with the International Anaplastology Association's 28th Annual Educational Conference. The examination will be administered to authorized candidates in the Capitol Room of the Sheraton Denver Downtown in Denver, Colorado beginning at 1:00 pm MDT. Additional details are available on the BCCA website at www.bcca-cca.org. Registration to sit for the CCA examination is a separate process from the IAA conference registration.

JOINT JOURNAL

The International Anaplastology Association, Institute of Maxillofacial Prosthetists & Technologists, and International Association for Surgical Prosthetics and Epithetics are collaborating on a joint journal relevant to the field of anaplastology. The first issue is expected within 2014 and will contain 18 articles. The emergence of this journal is attributed to the efforts of certificants Jay McClennen and Anne-Marie Riedinger. Additional details are available by contacting the IAA at www.anaplastology.org/contact.

LEADERSHIP

Governed by leading anaplastologists in practice and academia, the Board of Directors endeavors to advance clinical anaplastology by certifying competent clinical anaplastologists, promoting education and research, and elevating the standard of care in professional practice.

The Board is solely responsible for essential decisions related to the development, administration, and ongoing maintenance of the Certified Clinical Anaplastologist (CCA) certification program.

PAST LEADERSHIP

The BCCA recognizes the commitment and efforts of the 2013 outgoing Board Directors, David Hoehn and Suzanne Verma, for their unwavering support. David Hoehn fulfilled his term as a Director and remains at the San Francisco VA Medical Center as a Restoration Clinician. Suzanne Verma fulfilled two consecutive terms as the BCCA's Vice President and is now serving on the International Anaplastology Association (IAA) Board of Directors. The BCCA presented Ms. Verma with the Distinguished Service Award in recognition of her exceptional service and contributions to the Board.
